EDUCATION

Arizona State University

Master of Science in Computer Science; **GPA: 3.8/4.0**

Tempe, AZ

May 2025

S.D.M. College of Engineering and Technology

Bachelor of Science in Electronics and Communication; **CGPA: 9.56/10.0** (top 1%, Class of 2020)

Karnataka, India

June 2020

SKILLS

Languages : JavaScript(ES5/ES6), Python, TypeScript, C, C#, .NET, HTML, CSS, JSON.

Frameworks : Node.js, Redux, React.js, React Native, Next.js, Pytorch, Langchain, Tensorflow, Scikit-learn.

Database : MongoDB, DynamoDB, MySQL, PostgreSQL, Milvus, Supabase.

Tools : Postman, AWS, Git, Jenkins, Redis, Selenium, Docker, Appium, Confluence, Jira, Kubernetes.

Proficiencies : SDLC, STLC, SCRUM, Agile, Frontend, Backend, Unit testing, Automation, Micro-services, CI/CD, DevOps.

Soft Skills : Communication (verbal and written), Leadership, Collaboration, Mentorship.

WORK EXPERIENCE

Enterprise Technology, Arizona State University, Tempe.

Arizona, United States

AI Full-Stack Software Developer

January 2024 - Present

- Working as an **MLOps** engineer, responsible for developing environments and ML pipelines for various LLM applications by provisioning **Kubernetes** cluster on **AWS** using **Docker** and **Terraform**.
- Building a cutting-edge AI/ML platform and custom **LLM applications** for ASU faculty and staff as part of the AI Acceleration team using **React.js**, **DynamoDB** and **AWS Lambda**.
- Enhanced **Milvus vector database** performance through optimization of schemas, triggers, and dynamic queries. Implemented efficient data ingestion using diverse chunking and scraping strategies for optimal database functionality.

Allegation.

Bengaluru, India

Software Engineer II (Full-Stack)

March 2022 - July 2023

- Enhanced communication efficiency between IoT devices and the Engage mobile application by implementing **RESTful APIs** as part of backend development, resulting in seamless management of **100,000+** users.
- Incorporated **Redux** state management into the frontend development of the Engage mobile application, resulting in a remarkable **80ms** reduction in response times and a significant 20% improvement in the overall app's responsiveness.
- Set up a Jenkins **CI/CD** pipeline that automated **100+** weekly builds, while utilizing **AWS** services like **ECR**, **ECS**, **S3**, and **AWS Fargate** for seamless DevOps.
- Engineered a robust **Automation Framework** using **Python**, **Selenium**, and **Appium** to automate testing for web and mobile apps, resulting in a **70%** reduction in manual efforts.

Software Engineer I

June 2020 - March 2022

- Played a pivotal role in integrating access code options into both the front-end and back-end of the Engage mobile application, achieving a remarkable **35%** increase in user adoption and significantly enhancing security.
- Engineered and deployed a **Python** and React-based **Card-Simulator tool** with VirtualBench integration, replicating various card scenarios and eliminating the need for over 30 physical card types.
- Accomplished advanced **geolocation-based** features within Engage mobile application, allowing users to control access remotely. This feature contributed to a **80%** increase in remote access usage and client satisfaction.

Software Engineer Intern

January 2020 - June 2020

- Led the development and deployment of a full-stack web application utilizing **React.js**, **Node.js** and **AWS S3**, enabling the software team to centralize document storage and transition to online documentation.
- Developed a front-end application for Azure DevOps Data Mining using **React.js**, seamlessly integrating **Azure APIs**, and streamlining data extraction, ultimately reducing manual scraping by **40%**.
- Conducted comprehensive python code reviews, testing, **API documentation**, and implemented code refactoring techniques, leading to a remarkable 15% reduction in codebase errors and improved code maintainability.

PROJECTS

AI-Imagine. ([link](#)) [React](#) | [MongoDB](#) | [Node.js](#) | [Dall-E AI](#) | [Express](#) | [Tailwind](#) |

January 2023 - March 2023

- Developed a React application to facilitate image creation through the utilization of the Dall-E API. Users can effortlessly craft images and seamlessly share them within the community, while also having the option to save the images directly to their devices.

CoDev Space. ([link](#)) [Web Sockets](#) | [React](#) | [Redux](#) | [Node.js](#) | [MongoDB](#) | [Express](#)

July 2022 - September 2022

- Crafted an collaborative online Python coding IDE using React and Web Sockets enabling real-time code development and execution, featuring live collaboration through shared coding rooms, fostering seamless teamwork among users.

Route Tracker. ([link](#)) [React Native](#) | [Node.js](#) | [MongoDB](#) | [Express](#)

June 2021- September 2021

- Developed a React Native mobile app harnessing GPS capabilities to track and record routes, storing them in MongoDB for review, distance tracking, and implementing comprehensive user authentication.
